Making Things....

In *An Unexpected Path*, Namid's sister, Abequa, finds out that her place is to make jewelry. She is creative and can give beautiful art to her people. Design your own piece of jewelry, or an arrow or spear if you prefer. Draw what it would look like in the box below, and then explain why you made it look the way you did.

Herbs That Heal

Historically, Native Americans have depended on the land to survive. In fact, almost every aspect of their lives related to their environment. Using animals and herbs, they made their own homes, food, medicine, and clothing. Some of the herbs the Indians used as medicine are still used by some people today.

Below are some common ailments treated in some uncommon ways.

Asthma

Skunk Cabbage was used by the Dakota and Winnebago tribes to relieve asthma.

Backache

The Catawba tribe treated back pain by drinking a tea made with **Arnica Root**.

Bronchitis

Creosote Bush leaves were used in a tea to cure bronchial and other respiratory problems.

Burns and Skin Sores

The Kiowa Indians boiled **yellow-spined thistle blossoms** and saved the liquid to treat burns and skin sores.

Coughs

The inner bark of **white pine** was used by Indian people in a tea for coughs and colds.

Headaches

The Onondagas steeped **pennyroyal leaves** and drank this tea to cure headaches.

Take-Home Activity: Using the Internet at home or at your school's library, research the methods Native Americans used to treat the sick and injured. You may include information about herbal medicines like the ones described above, as well as spiritual healing. You may focus on a single Native American tribe or research a variety of groups. Write a 1 page essay on a separate sheet of paper explaining what you have discovered.

A peek at Native American History....

The earliest ancestors of North America were known as Paleo-Indians, sometimes referred to as the Clovis People. They lived in the southern United States between 10,000 and 40,000 years ago, but left very few records about their lives. We have learned that they camped wherever there were animals to hunt and either lived in caves or used the animal skins to make crude shelters. They invented spears with stone points. The Paleo-Indians are one of over 561 different Native American tribes that have lived in North America.

An interesting fact about Native American mythology.....

One form of Native American mythology was based on the most visible of the heavenly bodies, the sun and moon. Some cultures considered them the eyes of a Supreme Being. Myths of human descent from a sun god were known among North American Indian tribes, including the Arapaho and Blackfeet. There are also many tales of animals or people playing the part of the sun or moon. In one story, the moon is stolen, and Yellow Fox must take its place and become the new moon.

Roles of Native American Women

While most American Indian groups did not allow women to perform traditionally male roles like hunting and fighting in war, some tribes did and even encouraged it! The Ojibwe tribe highly respected women hunters and spiritual leaders even though their existence was very rare. The Lakota tribe encouraged ALL women to learn to hunt and fight in case they would need to one day when the men were away from the village. The Iroquois tribes also had somewhat unusual gender roles. They had a male leader and a female leader who ruled and took care of the community together, and women were very important in their villages. People traced their ancestry through their mothers and grandmothers, and when couples married, the man became part of the woman's family and moved into her family's house. Namid's tale in *An Unexpected Path* was inspired by the histories of these Native American peoples.

Many different Indian tribes have existed in American history.

To find a list of US Indian tribes listed geographically, visit the website:
www.hanksville.org/sand/contacts/tribal/states

Assignment: Research an Indian tribe of your choice. On a separate piece of paper, write a one page summary describing the tribe. Include information such as geographical settling habits, rituals, hunting tools and techniques, diet, and any mythical beliefs. If the tribe had a famous leader, describe that person's achievements.
